

IN THE SPECIFICATION

Following amendment, claims 1, 4-8, 15, 42, 47 and 50-51 remain. Please cancel claims 2, 3, 9-14, 17-26, 28-29, 34, 36, 43-46, 48-92, 95, 100, 102-104, 107-109, 112 and 114 without prejudice.

In response to the stated objection, although applicants submit that the organization of the present specification is adequate, Applicants propose amending the present specification to place a new "summary of Invention" section above the "Brief Description of the Drawing section that currently appears at page 1 line 16.

The text for the new "Summary" section would consist of the "Introduction" section currently at page 3, line 19 to page 4, line 8. The heading "Introduction" would be replaced with Summary of Invention". Because these headings are non-substantive, no new matter is introduced.

If this proposal is acceptable to the Examiner, a substitute specification will be provided.
